# Castle Peak Game

— Share every joyful moment with Castle Peak Game

## □ What is the Castle Peak Game?

It is a blockchain solution for game industry to reduce cost and risk and achieve win-win, and it will effectively solve many drawbacks brought by the traditional centralized game R&D and publishing mechanism and platform, to enable the global game CP to enter MEA game blue ocean market based on low cost and low risk, so that more than 330 million MEA game users can enjoy the colorful game world, and finally a global game ecosystem that can make the game value flow more effectively and fairly worldwide will be built.

## □ Market opportunity

- The MEA game market with the largest year-on-year growth of annual income (with 57% in 2016) has an astonishingly low market concentration ratio and becomes the growth engine of global mobile games.
- The “block chain + game” business application conforms to the development trend of blockchain 3.0 era.
- Help the middle and small-size CPs to get over MEA game market barriers and bring higher quality experiences to MEA game players.
- Share the huge bonus obtained in the development of MEA game market.

## □ Operation mechanism of Token-CPG

- The Token designed and developed based on Ethereum enables the game enthusiast, CP and other holders to fully control their own assets according to ERC-20 protocol.
- Through conversion smart contract, account distribution smart contract, fund-raising smart contract and voting smart contract, a decentralized solution is provided for game enthusiast and CP to solve the problems such as united payment, profit distribution, capital source, communication on decision-making, etc.
- The destruction mechanism is mainly designed to control the turnover of CPG in the secondary market, prevent CPG inflation, and ensure the future added value of CPG to a certain degree in the long time.
